Buildings account for about half of cities’ greenhouse gas emissions. Contending with the reality of the climate emergency requires us to wholly reimagine the way we build and structure our communities.

The Reinventing Cities competition harnesses the creativity of architects, developers and innovators to foster and scale low-carbon solutions that will help move cities toward net zero emissions goals.

ITA - Italian Trade Agency & C40 Cities Climate Leadership Group
invite you to

Reinventing Cities
Designing & building in the face of the climate crisis
Italian Pavilion at MIPIM 2020
