

# LA KARAMA

At the heart of the urban design is three main concepts:

- Participatory design
- Sustainability (economic, social, environmental)
- Social cohesion

Considering these underpinnings, we created different sorts of urban squares:

- A unifying aspect of all of them is bike lanes, public seating areas, and walkability, but also, depending on the zones,
- Urban Gyms
  - Urban Libraries and Art Centers
  - Urban Outdoor Music Bar
  - Scaffolding and Façade Extensions
  - Parking Structure

And so... La Karama is born!

URBAN SQUARES

SCAFFOLDING  
(AS A DESIGN  
METHOD)
